# Business Internet

Wireless commercial broadband: a cost-effective solution that can be deployed quickly and easily.

## The Broadband Breakthrough

Simply Bits offers Tucson's most flexible, scalable and cost effective business Internet service. When your business demands high capacity, mission-critical bandwidth, Simply Bits' broadband solutions deliver unlike any conventional cable-based service. Plus, Simply Bits commercial broadband can be installed quickly and provides outstanding value.

Broadband wireless technology from Simply Bits gives metro-Tucson and Southern Arizona customers flexible connectivity choices and alternatives to the big-box providers. With some of the largest wireless bandwidth capacity in Tucson, Simply Bits can provide your primary Internet connection as well as backup and redundant connections to ensure your business

continuity. Simply Bit's commercial broadband doesn't require you to purchase special equipment, eliminating expensive hardware costs. As your business grows, you can upgrade your Internet connection to faster speeds with a simple phone call.

### *Keeping Up With the Speed of Business*

Simply Bits operates its own private network in Southern Arizona, and we're able to cover areas where there has previously been no viable high-speed option. With bandwidths from 3Mbps to 25Mbps, and coverage spanning the metro-Tucson area, as well as portions of Pima, Pinal, Santa Cruz and Cochise Counties, Simply Bits has a package to meet your needs.

## The Broadband Breakthrough

### About Our Broadband

Simply Bits operates a self healing, redundant, next generation wireless broadband network that provides coverage throughout metropolitan Tucson. We have taken the time to build our network in order to accommodate the most demanding applications while keeping affordability in mind for small, medium, and large sized businesses. Our redundant network infrastructure allows us to provide the excellent services our subscribers are accustomed to.

### Features & Abilities

- Send and receive email quickly and efficiently.
- Download files, web pages and images quickly.
- Create a virtual private network (VPN) between two or more offices enabling file sharing, print sharing and other network capabilities, merging your diverse locations into one seamless network.
- Protect your office from malicious users of the Internet (optional built-in firewall).
- Operate with an "always on" internet connection.
- Eliminate the need for additional phone lines, modems and dial-up accounts.

### Additional Benefits

- Cost - significant cost savings can be achieved compared to standard leased line solutions.
- Performance - dedicated two-way connection with bandwidths of up to 24Mbps download / 14Mbps upload.
- Quality - you won't find a higher commitment to quality in metro-Tucson.
- Availability - installation within days, bandwidth upgrades within hours.
- Monitoring and control - provisioning of management statistics and performance reports 24 hours a day means that we can have it fixed before you can call us to let us know there's a problem!
- Support- experienced and accredited technical support 24 hours a day.

### On-Net Locations:

Ask about our additional services for Simply Bits On-Net locations, with symmetrical bandwidths up to 100Mbps download/upload."
