Bundled Services Designed
To Make Connectivity
Simple and Affordable
for Small Businesses

Intercom Multiple Locations Affordable
DECT6.0 **AirVoIP** Unified
Cordless Messaging
Voice Mail Conference Calling Flexible

Redefining the concept of a business phone system

Simply Bits offers a specially tailored Small Business solution allowing businesses needing 1 to 7 phones an extremely affordable way to take advantage of the Cloud-based VoIP technology.

Simply Bits has been successful in deploying Cloud-based VoIP services to small and medium businesses throughout Southern Arizona. These solutions, previously, could pose challenges to small businesses of home offices where they previously used few phone lines and simple corded or cordless phone handsets. Our new AirVoIP SOHO Bundles, can now save these small organizations money and time while making the businesses more productive and giving them a more professional appearance.

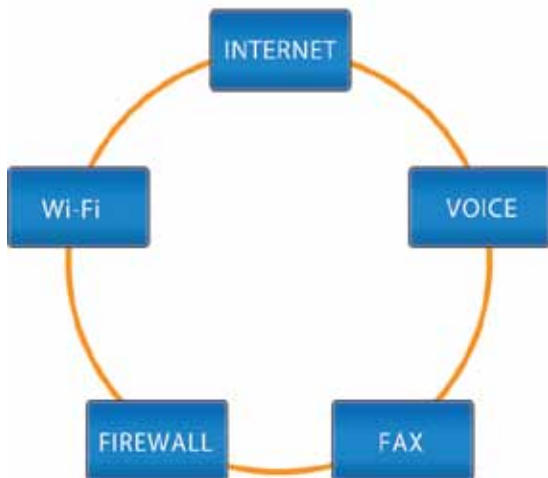

Features Highlights

- Simple Line Based Operation
- Interactive Voice Response (IVR)
- Voice Mail
- Unified inbox / Voice Mail to E-mail
- Phone line roll-over
- Direct Inward Dial phone numbers
- Conference Calling
- Intercom calls
- Multiple locations

AirVoIP Small Business Solutions

AirVoIP Advantages

- Provides advanced communications at affordable prices.
- It is simple to deploy, it plugs into your existing LAN.
- Easily add/moves/modify with no wiring changes
- Little to no retraining necessary to use.
- Uses the new DECT6.0 standard to ensure crystal-clear conversations and avoids Wi-Fi interference.
- Prevents "Vendor lock-in" by utilizing standards-based technologies and hardware.
- Reduce overall telecom costs by delivering Internet and Phone service via the same wire and by allowing your voice and data to share capacity.
- Saves costs on faxing by reducing paper and toner costs when faxes are electronically delivered to e-mail accounts.
- Includes voicemail technology which easily integrates into E-Mail systems to create a unified Inbox containing e-mail, faxes, and voicemail.
- Gives a business the ability to use Interactive Voice Response systems and Auto-attendants to sort calls, give customers self-service options, and to make a business sound more professional.
- Allows multiple offices/locations to work together seamlessly as a single phone system without requiring special phone lines or tie lines.

AirVoIP Bundle

The AirVoIP is available in convenient bundles of business-quality Internet access, Managed Firewall service, Managed Wi-Fi, VoIP phones, VoIP phone service, and a dedicated Fax-over-IP (FoIP) line.
