The Broadband Breakthrough

Simply Bits offers Tucson's most flexible, scalable and cost effective business Internet service. When your business demands high capacity, mission-critical bandwidth, Simply Bits' broadband solutions deliver unlike any conventional cable-based service. Plus, Simply Bits commercial broadband can be installed quickly and provides outstanding value.

Broadband wireless technology from Simply Bits gives metro-Tucson business flexible connectivity choices and alternatives to the big-box providers. With some of the largest wireless bandwidth capacity in Tucson, Simply Bits can provide your primary Internet connection as well as backup and redundant connections to ensure your business continuity.

Simply Bits commercial broadband doesn't require special equipment, eliminating expensive hardware costs. As your business grows, you can upgrade your Internet connection to faster speeds with a simple phone call.

Keeping Up With the Speed Business

Simply Bits operates its own private network in Southern Arizona, and we're able to cover areas where there has previously been no high-speed option. Whether you need 1 MB of service on the far-east side, 10 MB of service in Marana, or hundreds of megabits in Green Valley - Simply Bits has a package to meet your needs.

The Broadband Breakthrough

About Our Broadband

Simply Bits operates a self healing, redundant, next generation wireless broadband network that provides coverage throughout metropolitan Tucson. We have taken the time to build our network in order to accommodate the most demanding applications while also keeping affordability in mind for small, medium, and large sized businesses. Our redundant network infrastructure allows us to provide the excellent services our subscribers are accustomed to.

Features & Abilities

- Send and receive email in a fast and efficient manner.
- Download files, web pages and images quickly.
- Allow for a virtual private network (VPN) between two or more offices enabling file sharing, print sharing and other network capabilities.
- Protect your office from malicious users of the Internet (optional built-in firewall).
- Operate with an "always on" internet connection.
- Eliminate the need for additional phone lines, modems and dial-up accounts.

Additional Benefits

Cost - significant cost savings can be achieved compared to standard leased line solutions.

Performance - dedicated two-way connection with symmetrical speeds of up to 100Mbps.

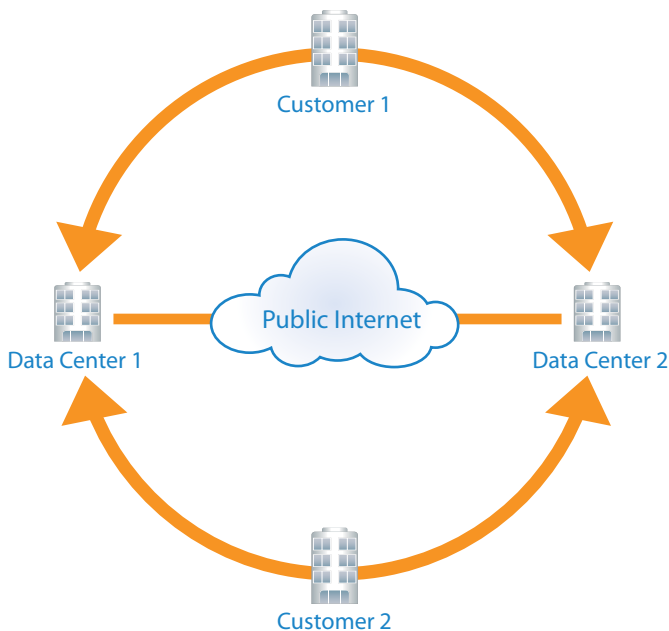

Quality - you won't find a better commitment to quality in metro-Tucson.

Availability - installation within days, bandwidth upgrade within hours.

Monitoring and control - provisioning of management statistics and performance reports 24 hours a day means that we can have it fixed before you can call us to let us know there's a problem!

Support - experienced and accredited technical support 24 hours a day.
